

Ladder Safety (E-Learning)

Course Aim

This online training aims to help organisations work towards compliance with the Work at Height Regulations 2005 by teaching delegates to understand the things they need to do before they use a ladder, as well as during use.

Available in over 35 languages

Our courses are machine translated* into a variety of popular International languages, so regardless of location or language preference, we've got you covered. Our machine translated content includes the translation of course transcripts and test questions.

**Content which is not English may be machine translated and is for assistive purposes only. We cannot guarantee the accuracy of translations.*

Who Should Attend?

This course is suitable for delegates who use ladders within their workplace. In the UK, ladders account for roughly 40% of accidents that are a result of falling from height. Evidently, employers need to provide their staff with the knowledge on how to safely use a ladder, as well as how to conduct a pre-check before using a ladder. This, in turn, will help organisations to reduce the risk of a fall from height occurring.

Agenda

The course modules cover:

- Ladder Selection
- Ladder Pre-Check
- Ladder Setup
- Ladder Use

Course Duration

This is a 25-minute course.

Certification

Delegates will receive a HSS printable certificate in Ladder Safety upon completion of the course.

This course is approved and accredited by IOSH.
